PROFESSIONAL SUMMARY

Computing graduate from Queen's University with an option in Security, bringing hands-on experience building real-world software systems and a strong foundation in cybersecurity, cryptography, networking, and secure application development. Proficient in Python, Java, C, and Git, with practical experience across full-stack development, secure protocol design, and software quality assurance. Actively pursuing CompTIA Security+ and Network+ certifications, a fast learner who picks up new systems quickly and is always ready to be trained and contribute from day one.

EDUCATION & ACHIEVEMENTS

Queen's University

Kingston, ON

Bachelor of Computing (Honours), Security Option | GPA: 3.51/4.0

2022 – 2026

- **Relevant Courses:** Intro to Cybersecurity, Cryptography, Software Quality Assurance, Software Architecture, Computer Networks, Intro to Artificial Intelligence, Operating Systems, Algorithms and Data Structures

SKILLS

Technical Skills: Python, Java, C, Haskell, Prolog, HTML/CSS, SQL, SQLite, Flask, Git, Figma, Wireshark, Cryptography, Network Security, Operating Systems (Windows, Linux), Microsoft Office (Word, PowerPoint, Excel, Teams, Outlook)

Soft Skills: Team Leadership, Cross-Cultural Communication, Staff Training and Onboarding, Customer Service, Adaptability, Multilingual (English, Mandarin, Farsi/Dari, Pashto, Urdu, Hindi), Technical Writing, Time Management

TECHNICAL PROJECTS

SecureShare — CISC 468: Cryptography

Winter 2026

- In a group of 2, built a peer-to-peer encrypted file sharing CLI application with two fully interoperable clients in Python and Java. Features include mDNS-based peer discovery, mutual RSA-2048 authentication, AES-256-GCM encrypted transport with perfect forward secrecy via ephemeral Diffie-Hellman, a password-protected local vault (PBKDF2 + AES-GCM), signed manifest-based offline file redistribution, and automated key rotation with KEY_MIGRATION broadcasting. Tested with 150 unit and interoperability tests across both clients.
- **Skills developed:** applied cryptography (RSA-PSS, AES-GCM, HKDF, PBKDF2, DH key exchange), dual-language system design (Python and Java interoperability), secure protocol design, multi-threaded networking, and test-driven development.

Flask Rental Management Platform — CISC 327: Software Quality Assurance

Fall 2024

- In a team of 3, developed a full-stack web application using Python and Flask with a SQLite database, supporting user registration and authentication, maintenance request submission, and rental property listings. Designed UI mockups and user flows in Figma before implementation. Built across six progressive assignments covering a complete QA lifecycle: unit testing with pytest and unittest, code coverage analysis, integration testing, and end-to-end testing.
- **Skills developed:** full-stack web development, UI/UX design with Figma, relational database design with SQLite, RESTful routing with Flask, software quality assurance, automated testing (pytest, unittest), and test coverage analysis.

GNUstep Architectural Analysis — CISC 322: Software Architecture

Winter 2024

- Working in a group of 6, conducted a three-phase architectural analysis of GNUstep, an open-source Cocoa implementation. Produced a conceptual subsystem model, validated it against the actual source code via static analysis to identify architectural drift, and authored a formal enhancement proposal. All reports and presentation slides are hosted on a live project site.
- **Skills developed:** software architecture modeling, static code analysis, reverse engineering of large open-source codebases, architectural documentation and diagramming, technical writing, and collaborative version control with Git.

WORK EXPERIENCE

Front Desk Representative

May 2023 – Present

Queen's University, Residence Life and Services | Kingston, ON

- Greeted and assisted hundreds of students, residents, and guests daily across four front desks, handling inquiries, resolving concerns, managing appointment bookings, writing shift logs, and handling 50+ emails daily, ensuring every person felt acknowledged and supported promptly.

Sales Associate, Seasonal Department

Feb 2023 – May 2025

The Home Depot | Kingston, ON

- Worked as a part-time Sales Associate at The Home Depot, helping customers find their needed products.
